

# Green Sea turtle Program 2022, Tortuguero, Costa Rica

## Education and Outreach Assistant

**Project Description:** Environmental Education and Community Outreach with a conservation sea turtle organization.

**Organization:** Sea Turtle Conservancy (Former Caribbean Conservation Corporation)

**Location:** Sea Turtle Conservancy Biological Station, Tortuguero, Costa Rica

**Dates:** 7th June to 24th August

12th August to 1st November

**Deadline to apply: 12th March, 2022**

### ***Project's Summary:***

Research and monitoring of sea turtles in Tortuguero, Costa Rica was initiated in the 1950's by legendary sea turtle researcher Dr Archie Carr. Dr Carr continued his work in Tortuguero until his passing away in 1987. In 1959, the STC started the Green Program with the goal of studying green turtles (*Chelonia mydas*) in the area. Each year, from June to October, the researchers from STC collect data about this threatened species. The intensive program combines monitoring and research activities with an **Education and Outreach Program in the local community.**

### ***Work description:***

A group of assistants will participate in the green turtle season. The team will be conformed by people from all over the world, emphasizing people from Latin-American and Caribbean countries. 16 Research Assistants (RAs), divided in two periods of two months and a half, will be focused in the field work while the **Environmental Outreach Assistant (EOA)**, has the option of working for 5 months during the green season, will be more focused in the educational work.

At the beginning of the Program, the Research and Field Coordinator (RFC) will capacitate the RAs and the **EOA** in the field work, including night patrols, morning census and nest monitoring and excavation. You will learn how to tag the turtles, take biometric data, register nesting activity during morning census and other abilities related to data collection.

After field training, the RAs will focus on the monitoring and field activities, while the **EOA** will concentrate on the **development of the Educational and Outreach Program** under the supervision of the **Environmental and Outreach Coordinator (EOC)**. Main tasks the **EOA** will be involved with are:

- Working in educational centers (kinder, school and high-school)
- Working in extra-curricular activities (library, festivals, Junior Assistant Program, beach-cleanings...)

- Assisting with activity-design process, according to EOA's experience.
- Assisting a local environmental certification for hotels and restaurants.
- Assisting in educational material creation, according to EOA's experience. Assisting in outreach work (Social media, community announcements...) according to EOA's experience.

Besides, the **EOA** will, as possible, help with the field work as well as assisting in the STC's Visitor's Center, giving information about STC's work to the visitors. Plus, all the Assistants will be involved in helping out with eco-volunteer's training, who will stay in the station for a short period of time, as well as supervising volunteer groups during beach patrols.

Monitoring activities during the Green Turtle Program are carried out along 8 km (=5 miles) of nesting beach. Beach patrols require walking many kilometers in extremely soft sand and in very extreme weather conditions; therefore an excellent physical condition is a requirement for the RA and **EOA** positions.

### ***Desired skills***

- Native Spanish and good knowledge of English
- Education in Pedagogy, Education careers Environmental Sciences, Sociology, Anthropology or related fields, with a social/educational perspective.
- Previous educational experience in rural communities, preferably in Latin America.
- Experience working/living in multicultural environments, experience working/living in isolated locations for extended periods
- Previous experience in fieldwork
- Availability for the entire period of the program greatly improve your chances of being selected for a position. For the Green Season, there is the possibility to chose between two periods of time (Group 1: June 6 – August 25, 2020 or Group 2: August 12 – 1 November, 2020) or the full season. Please write on your application the dates of availability.

### ***Information about the application process:***

**EOA** positions are voluntary and the selected person is expected to plan and finance his/her own travel to and from Tortuguero. Selected **EOA** will receive board and lodging at the STC Field Station for the duration of his/her time working for STC in Tortuguero.

To apply, please send the following documents:

- Completed Application Form (see following page)
- A cover letter explaining why you are interested in the **Education and Outreach Assistant** position; include details of any relevant experience and a statement of your level of proficiency in English and Spanish (either a formal qualification or an indication of your written/oral comprehension)

- A CV or resume with pertinent information
- The names and e-mail contact details of three professional references
